

HS600 MediaSignage™ Player

With the Hughes HS600 media player, implementing digital signage is affordable and simple. Based on the LG Smart TV WebOS technology, this player makes it possible to display both digital signage content and live television programming on any HDMI-compatible television.

The HS600 digital media player supports resolutions up to 4K and can store up to four hours of HD content for playback. As part of the Hughes® MediaSignage system, your organization can leverage the power of video and high-quality images to both engage customers and employees. The player can be configured to play in remote locations with a wide range of content and layouts, including live television.

The HS600 arrives as an out-of-the-box, ready-to-install appliance. Utilizing a simple setup wizard, the customer connects the player to their preferred network (wired or wireless) as well as the the Hughes MediaSignage cloud service. Once connected, the player receives the necessary content and information to assume the desired playback role. Multiple players can run on a single network and players can be moved from location to location.

The HS600 digital media player supports a large array of template designs that provide the ability to play videos, still images, and scroll through data feeds like social media, sports, local weather, and more. The HS600 is designed for reliability and will continue to play assigned content, even if the network connection becomes disabled.

The HS600 is a core component of these Hughes digital signage solutions:

- Breakroom Signage
- Lobby Signage
- Campus Vision School Signage
- Waiting Room Signage
- Digital Bulletin Board
- Digital Menu Board
- Digital Promo Board
- And much more!

Technical Specifications

- Internal Storage: 8 GB
- Operating System: LG WebOS
- Outputs: HDMI UHD up to 4K 60 Hz, DP, RS-232C
- Inputs: 2 HDMI (HDCP 2.2), DP (HDCP 1.3), RS232C, RJ45 (LAN), IR, 2 USB 2.0
- Weight: 1.9 lbs / 0.87 kg (shipping weight 3.9lbs)
- Dimensions (WxHxD): 10.2 in. x 1.4 in. x 7.3 in. / 339 mm x 124 mm x 314 mm
- Operating Temps: 32 °F to 104 °F / 0 °C to 40 °C
- Power Supply: 100 to 240 Vac, 50/60 Hz – built in
- Power Consumption: 23W
- Wi-Fi enabled
